

How to Request a HaulHub Account

If you do not yet have an account on HaulHub, fill out and submit the form at this link:

[HaulHub New User Request Form](#)

Once the account has been created, you will receive an email confirmation with information on how to log in.

How to Request the Creation of a New Project on HaulHub

To start a new project on HaulHub, fill out and submit the form at this link: [HaulHub New Project Request Form](#)

Note that you and any employees you list on the form should already have an account on HaulHub. Please use the New User Request Form first for anyone that doesn't have an account.

Once the project is created, an email response will be sent with confirmation.

How to Add Other People to HaulHub Projects

If you need to add more people to a project on HaulHub, go to the project page and click on the "Team" button, then click "Add Member".

From there, you can search for anyone that already has a HaulHub account and click the "Add" button, then click "Done" to save the changes. The added employee will then be able to access the project on HaulHub. If you can't find who you're looking for, that means they are either already added to the project or don't have an account yet.
